

DENGUE FEVER

FIJI NATIONAL UNIVERSITY

Office of the Registrar
Uniclinic

From January 1 to February 6, 2020, the Ministry of Health has so far recorded 335 cases of dengue fever with one death resulting from Dengue Fever.

DENGUE SYMPTOMS

- Rashes
- Sudden onset of high fever
- Vomiting
- Diarrhoea
- Pain behind the eyes
- Stomach pain
- Headaches
- Muscle and joint pain

SAY NO TO MOSQUITOES

Please visit your Uniclinic, your nearest Health Center or G.P if you present with any of the described symptoms.

PREVENT DENGUE

- Prevent Mosquitoes from Breeding
- Eliminate all breeding sites, prevent **water-logging** in surroundings
- Remove all sources of **stagnant water accumulation** (pots, open containers, discarded tyres, jars, etc.)
- Keep storage tanks covered

PREVENTION IS BETTER THAN CURE

- Wear **full sleeved clothes** to avoid exposure to mosquitoes
- Use **mosquito net** while sleeping even at day time
- Use mosquito repellants during day and night

Uniclinic Opening Hours
